VOICE OF THE EXPLOSIVES INDUSTRIES

EXPLOSIVES ENGINEERING

SPECIALIST
K9'S
LIMITED

This Month's Features:

Highlights of Fulmination 2025

If you oversaw the Defence budget for the next ten years...

Beyond TNT Equivalent

Cancer Risk in Army Bomb Disposal Veterans

Take your career to the next level

with the **Diploma in Surface Mining Explosives Engineering**

Elevate your expertise

This specialised programme is designed to progress professionals within the explosives products and services industry.

Course outcomes

Through a blended learning approach in partnership with the University of Derby and EPC-UK, the diploma aims to enhance competence, professionalism and environmental management while promoting a zero-incident safety culture.

To find out more or join us for the September cohort, please visit: www.quarrying.org/explosives

epc-groupe.co.uk ➔

Advanced vibration monitoring equipment

Vibracord Tellus
Everything you need in a Vibration Meter.

Vibracord Gaia
Excels in the roughest of conditions.

Vibracord Hermes
High speed data logger.

Vibradata
Vibration monitoring software.

With greater accuracy comes improved results. EPC Metrics has brought Vibraqipo's technically advanced vibration monitoring products into the EPC Ecosystem, making customers' operations leaner and adding more value.

Our enabling suite of seismographic equipment can be expertly managed and serviced at **EPC Metrics' dedicated calibration facility**, where 'next level' customer service and industry leading capabilities set the standards for our sector.
