

---

## Overview

This standard exists in a test and evaluation role and covers the competences you need to contribute to post-test tasks relating to explosive substances and or articles.

You will be required to demonstrate that you can undertake post-test task to remediate the work environment, as directed, adhering to the relevant quality standards in accordance with approved procedures and practices.

This activity is likely to be undertaken by someone whose work role involves Ordnance, Munitions or Explosives work activities. This includes people working as test and evaluation and general explosives operators.

This standard replaces COGESA3.20.

---

## Performance criteria

### *You must be able to:*

- P1 work safely at all times, complying with health and safety, environmental and other relevant regulations, legislation and guideline
- P2 carry out post-test checks as directed
- P3 use the equipment, consumables and services correctly during post-test tasks
- P4 maintain the equipment in accordance with your organization's procedures
- P5 remediate the work environment as directed, segregate explosive substance and or article residues and products, in accordance with approved processes.
- P6 recover, return and report faulty equipment, in accordance with your organization's procedures and or the manufacturer's instructions
- P7 report data and information as directed
- P8 dispose of the process residues and products within the limits of your responsibility
- P9 adhere to the relevant quality standards
- P10 deal with any problems within your level of authority
- P11 report problems beyond your level of authority to the appropriate person

---

## Knowledge and understanding

### *You need to know and understand:*

- K1 the health, safety and environmental and other statutory legislation, regulations, safe working practices and procedures governing explosives and their implications for your area of work
- K2 the relevance of personal protective equipment (PPE)
- K3 the nature, characteristics, hazards and risks of the explosive substance and or article
- K4 the actions to be taken in response to an unplanned event
- K5 the test plan and procedures and your role in them
- K6 the roles and responsibilities of team members
- K7 the requirements of the post-test tasks
- K8 how to collect and segregate residues and products
- K9 the condition in which the site must be left
- K10 the equipment, consumables and services needed to complete post-test tasks
- K11 how to recover, return, and report faults in the test equipment
- K12 how to use, maintain, and report faults in the test equipment
- K13 how to consign residues and other products for disposal
- K14 reporting lines and procedures
- K15 the relevant quality standards and compliance regime
- K16 your level of responsibility

COGESAKR3.14

Contribute to post-test tasks relating to explosive substances and/or articles

---
