Explosives
Engineers

VOICE OF THE EXPLOSIVES INDUSTRIES

Official Journal of the
Institute of Explosives Engineers

EXPLOSIVES ENGINEERING

This Month's Features:

- The Engineering Evolution of Anti-Armour IEDs Developed by the Provisional IRA
- Performance of 3D-Printed Shaped Charge Liners Using Metal-Impregnated Filament
- Chief Inspector Report from HSE 1875-1880
- The ESSG: Driving Collaboration, Skills and Safety Across the Energetics Sector

Precision. Safety. Leadership in Explosives Risk Management.

Remediation

We are a trusted authority in managing explosive threats across defence, infrastructure and energy sectors, delivering specialist services with experience and commitment to excellence.

Why Leading Organisations Choose Us:

- ✓ Government & Defence-Cleared Personnel
- ✓ Full Compliance with International EOD Standards (IMAS, IATG, etc.)
- ✓ Proven Delivery Across Complex, High-Risk Environments
- ✓ Integrated, Intelligence-Led Risk Management
- ✓ ISO-Certified Systems and Procedures

Our Core Capabilities:

Site Remediation

Land Ordnance Disposal

Consultancy & Risk Mitigation

UXO Awareness Training

Features

- 8** Women in Explosives Event
- 9** Celebrating Peter Drinkwater's Honorary Fellowship with the IExpE
- 10** The Engineering Evolution of Anti-Armour IEDs Developed by the Provisional IRA
- 15** AquaGlu: Bio-Inspired Adhesives for Challenging Operational Environments
- 16** Performance of 3D-Printed Shaped Charge Liners Using Metal-Impregnated Filament
- 28** European Federation of Explosives Engineers ("EFEE")
- 32** Chief Inspector Report from HSE 1875 -1880
- 36** Introduction to Human Factors in the Explosives Sector
- 38** If you were Responsible for the Defence Budget for the Next Ten Years... Which Explosive Ordnance Technologies Would You Invest In?

DISCLAIMER: The opinions expressed in Explosives Engineering are those of the authors concerned. They do not necessarily represent the views of the Institute.
